SolarZone Xtra Exterior Films

SolarZone Xtra Exterior Films

The SolarZone Xtra range of window films are special versions of many of our standard SolarZone window films, developed for installation on the exterior of the window, instead of on the interior (room side) of the glass. Exterior films reject solar energy on the outer pane, keeping the inner pane cool and reducing the energy that penetrates inside even more effectively than a similar interior film. SolarZone Xtra offers one of the best solutions for keeping interiors cooler in the summer, maximizing savings on energy costs, and upgrading energy efficiency.

We've developed our SolarZone Xtra exterior films to bring exceptional energy efficiency to almost all glazing types, and to complement many types of Low-E glass, providing summertime cooling without affecting the wintertime insulation efficiency of Low-E coatings.

Reflective

Silver Xtra

With a strong visual statement, excellent heat rejection, and a speedy return on investment, Silver Xtra is the popular choice for commercial projects.

Solar Bronze Xtra

Delivers high levels of heat rejection in a warm, yet sophisticated, appearance.

Silver Matte 20 Xtra

Silver Matte Xtra provides interior comfort together with two-way night and day privacy.

Specialty

AzuLite 35 Xtra

AzuLite 35 Xtra high performance exterior film delivers a unique blue-toned appearance and exceptional solar performance. AzuLite transforms colored glazing to a sophisticated, low reflectance blue-silver. Compatible with almost all glazing types, AzuLite is the ideal solution for an aesthetic and energy-efficient makeover for tinted or clear glass.

Dual Reflective

Titan Xtra

Exterior films with a reflective, extremely energy efficient outdoor appearance that gives excellent solar heat rejection and rapid payback. The less reflective interior maintains a pleasant indoor ambience.

Spectrally Selective

e-Lite Xtra

Hanita's new premium e-Lite Xtra exterior films in 45% and 70% light transmission films curb the heat, without noticeably affecting the appearance of the glass. e-Lite Xtra provides an effective yet discrete energy saving solution that preserves the architectural integrity of high-end commercial and residential projects.

Hanita's e-Lite Xtra exterior window films deliver a universal solution to installation on modern glazing units, enhancing the efficiency of high performing, reflective, tinted, laminated, or Low E glass.

e-Lite Xtra provide the highest levels of energy saving performance in their category, and are cost-effectively competitive with the most prestigious films on the market.

e-Lite Xtra exterior films are available in 45% and 70% VLT, with PS adhesive

OptiLite 75 Xtra

OptiLite's subtle tint effectively filters heat-building IR radiation, keeping the building cooler without noticeably affecting the appearance of the glass.
